

When visiting a group of students you can select one or more of the below hands-on activities to engage your audience. Please additional links in this resource center on how to conduct these activities and what materials you will need.

## **DISPENSING ACTIVITIES:**

- Sterile compounding garbing races
- Preparation of a sterile product

## **CLINICAL/DIRECT PATIENT CARE:**

- Role play/demonstration of discussions among care team
- Mock “rounds” focused on appropriate material for level of students (i.e if pre-health sciences material from undergrad, if high school material from high school science—show how medication decisions link back to the basic sciences)
- Use of simulated EHRs
