13. Overall Comments

Sue completely demonstrated why she was awarded preceptor of the year. She pushes her residents to think beyond surface interventions. In topic discussions Sue would already know what I was or was not understanding and would go beyond to help me understand abstract disease states, such as acid-base. Sue was one of my more challenging preceptors of the year, but I appreciated the encouragement that she provided with some of the challenges. I'm very grateful to have had the opportunity to learn from her this past month.
