## **Writing Learning Objectives**

When writing learning objectives, use verbs from the table above that correspond to the activity type—**knowledge**, **application**, or **practice-based**.

Other verbs may be acceptable if approved by ASHP staff.

Application-based activities can also include some knowledge-based objectives, but the **primary focus** should be skill development.

## **Steps for writing effective learning objectives:**

- 1. Write each objective from the perspective of the **learner**—what the participant should be able to do or know after the session.
- 2. Make sure the objective reflects a **measurable outcome** of learning, not just the topic being covered.
- 3. Each objective should be **specific and achievable**; avoid compound objectives with multiple verbs (e.g., "describe and apply").
- 4. Use verbs that align with the **intended level of learning** (knowledge vs. application).
- 5. Ensure there is a **corresponding learning activity or assessment** for each objective that allows participants to demonstrate achievement.
